

## DOCUMENT MANAGEMENT FOR SAP with FIS/edc

### Cross-functional document management as a holistic solution

FIS/edc is an SAP optimization for finances and accounting, purchasing and procurement as well as for sales and distribution. Your document-based corporate processes in connection with business partners (e.g. vendors, customers) can be processed automatically and mapped in SAP. Documents such as incoming invoices, order responses and sales orders are digitally utilized for the respective process. Consequently, a high degree of automation is achieved for your process.

### Process automation in (financial) accounting

In (financial) accounting, your incoming invoices and payment advice notes are processed automatically via an OCR document recognition or via electronic formats such as EDI and ZUGFeRD. The OCR document recognition reads all relevant data from the document, matches it with master data and transfers the extracted information to SAP. Convenient postprocessing is possible at any time.

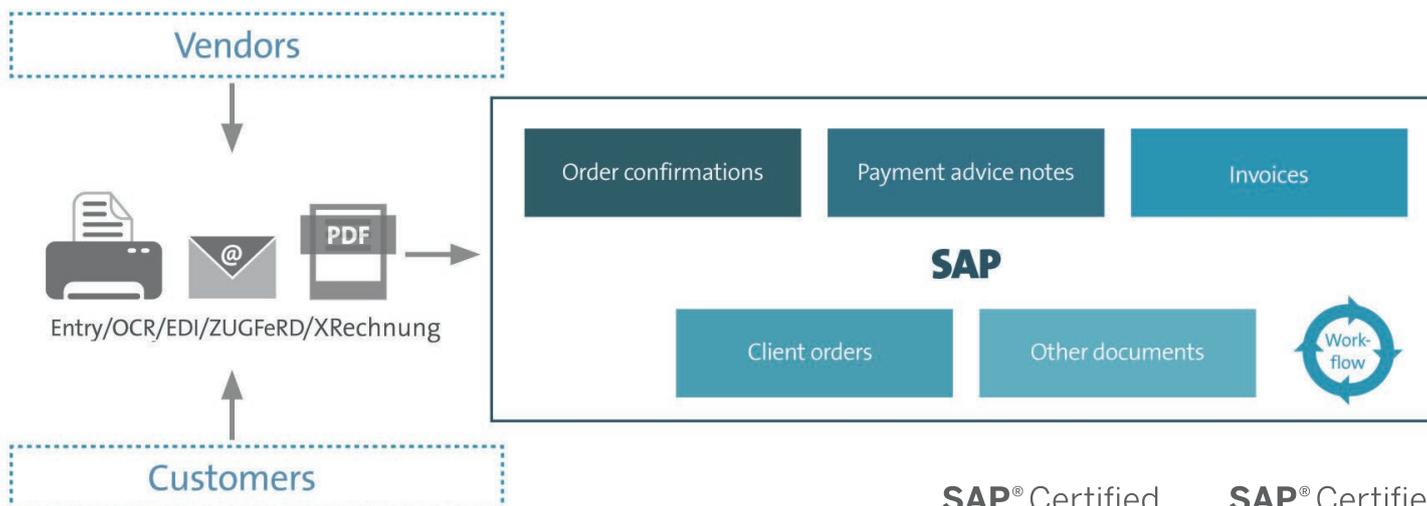

When receiving payment advices, they are automatically matched with open customer or vendor items. If there is a deviation between invoice and purchase order, you can easily communicate with the vendor from SAP. The approval process of incoming invoices is supported by an electronic workflow. The approver can process the transaction via a mobile application anywhere and anytime.

Processing evaluations inform the person responsible about optimization potentials and the degree of automation.

### Simplified purchasing and procurement

The process for incoming vendor order responses and delivery notes is particularly important for your purchase.

Comprehensive check and matching routines enable an automatic update of the order response relative to a purchase order. Discrepancies between order response and purchase order are highlighted and you can contact the vendor for clarification directly from SAP.

## SD process optimization

The process of sales order processing in your internal sales can be automated. *FIS/edc* enables an automatic update of sales orders that are received by the sales department in paper form, as PDF document or via e-mail etc. They will be processed with or without reference to a preceding document (e.g. quotation or contract). Consequently, the supply

chain, such as order response, shipping notification, goods issue and billing document, can be triggered immediately.

No manual and error-prone creation of sales orders by your office-based personnel is required. Consequently, they can dedicate themselves to their sales tasks.

## REFERENCES

## HIGHLIGHTS

- Full integration in SAP
- Compliance with highest quality standards through SAP certification
- Individual software solution tailored to your corporate-specific requirements
- Solution for the international use
- Future-proof through sustainable release strategy
- Compatibility with other FIS solutions

## BENEFITS

- Productivity and revenue increase through automated business processes in purchasing, sales and financial accounting
- Helps your company with digital transformation
- Shorter process times through high automation degree

### FIS Informationssysteme und Consulting GmbH

FIS Informationssysteme und Consulting GmbH is an expanding and independent enterprise and the parent company of the FIS Group, which employs more than 700 employees making companies more modern, economic and competitive every day. FIS focuses on SAP projects and the development of efficient solutions promoting digitization within companies. As one of the leading value-added SAP resellers in Germany, Austria and Switzerland, FIS is the market leader in technical wholesale with the all-in-one *FIS/wws* solution. Together with its Medienwerft subsidiary, FIS covers the complete range of SAP topics in the field of Customer Experience (CX).

More than 100 specialists operate and administer the customers' SAP systems in the FIS-ASP subsidiary data centers in Southern Germany. The FIS-SST subsidiary is the competent partner for nearshoring projects. The FIS-iLog subsidiary develops collaborative solutions for the convenient and secure process management of different companies on shared platforms.
