

FIS/mpm[®] Release ECC M6.0/8 Information (available as of December 2012)

Dear *FIS/mpm*[®] customers and prospective customers,

We are sending you enclosed a short overview of the new *FIS/mpm*[®] release *FIS/mpm*[®] ECC M6.0/8. For the complete version please directly contact Patrick Opatschek: +49 (69) 299226-256, p.opatschek@fis-gmbh.de

New features *FIS/mpm*[®] ECC M6.0/8:

- Common and standardized import and processing of master data and conditions (without batch input sessions)
- Restructuring of files during import
- New standardized duplicate check with fuzzy logic and phonetic search in the maintenance tools
- Performance optimizations when processing large datasets
- Workflow for processing worklists
- ERP classification of materials
- Various new functions in the maintenance tools including context menu
- Comprehensive selection options of conditions
- New Web service interface FIS/mds(FIS/cds) via *FIS/xee*[®]
- Archiving of *FIS/mpm*[®] worklists
