

Definitely the appropriate solution

SAP RETAILING FOR WHOLESALE

Market leader in the technical
wholesale (D/A/CH region)

Faster ERP implementation
due to predefined processes

Efficiency in purchasing, sales
and distribution and logistics

Field-tested solution by more
than 44,000 SAP users worldwide

FIS/www is the all-in-one solution for wholesale and its compound groups based on SAP. The industry-specific configuration of this solution reduces implementation efforts and project runtimes to a minimum. The wholesale ERP has been continuously developed since 1996 and can be used both in the SAP S/4HANA Cloud and on-premise. FIS is your central point of contact and offers expert advice and implementation from a single source.

Purchasing & procurement: Reduce ordering costs

Optimal ability to deliver and low capital tie-up are central success factors in the field of wholesale. This is why purchasing and MRP as well as quick processing times are of high importance. With its forecast and MRP functions, FIS/www determines the appropriate values and provides your purchasing department with optimal order proposals.

According to individual requirements, these purchase orders can be triggered automatically or after a check. The solution also considers any scaled conditions with your vendors and helps you sustainably reduce your purchase order costs. From the forecast to the verification of the vendor invoice, FIS/www includes optimizations for your purchasing department that are particularly tailored for wholesale.

Sales & distribution: Increase effectiveness

It is important in the operational day-to-day business (e.g. when working as a sales clerk) to quickly find the right information for customers. Besides the support of customers from the craft sector, the processing of bid invitations is also part of the day-to-day business.

Without FIS/www:
high adjustment
efforts required

SAP S/4HANA

Your company

With FIS/www:
considerably reduced
adjustment efforts

SAP S/4HANA

FIS/www Customizing &
Development

Your company

This is precisely where the FIS/www wholesale optimizations come into play. Apart from optimized user interfaces for your sales clerks, the solution also comprises many tools for effective bid invitation processing.

It goes without saying that industry-specific user interfaces, such as GAEB/ÖNORM and DATANORM, are supported. From quotation creation to payment processing – FIS/www includes many practical functions to ensure effectivity and high customer satisfaction.

Warehouse & Shipping: Accelerate processes

FIS/www controls the complex internal and external flows of wholesale goods in such a way that your shipping logistics is given optimum support. Central functions such as the picking and packing of goods as well as route determination/planning have been specially optimized for wholesale requirements.

The seamless connection of FIS/www with the SAP EWM warehouse management system also ensures smooth end-to-end processes in intralogistics.
