

WAREHOUSE LOGISTICS WITH FIS – field-tested and future-proof

FIS is your competent partner for warehouse logistics. Whether it is SAP ERP or SAP S/4HANA – FIS deals intensively with your individual logistics challenges and finds the right solution for you. FIS always focuses on a customer-centered consulting approach, which is particularly related to the existing processes and circumstances of your company.

Optimal supply chain integration with FIS

The supply chain describes the chain of connections and processes contributing to the added value of your company. Warehouse logistics is an elementary component of this chain. It comprises activities such as goods receipt processes, the storage of own and external goods, the storage type of the goods in the warehouse, the goods transport within the warehouse and the goods issue from the warehouse. With SAP LES/WM and SAP EWM, SAP provides industry-independent logistics solutions for covering warehouse logistics processes. Our professionals analyze the appropriate solution for your individual requirements.

The project implementation turbo FIS/ewm+ for SAP EWM

A large number of preconfigured processes in the FIS/ewm+ Template accelerates the process design phase of the SAP

Extended Warehouse Management (SAP EWM) implementation. You work with the system already during the conception phase and benefit from it in several ways:

- Shorter process design phase
- Accelerated implementation
- Joint project understanding
- Higher acceptance in the user departments
- Improved usability
- Investment security

Field-tested enhancements and convenient working with FIS/smw for SAP LES/WM

Our FIS/smw solution provides numerous field-tested enhancements specifically for SAP LES/WM at an attractive value for money and ready for immediate use.

Besides functions for a better (also mobile) processing of goods receipts and goods issues, additional cockpits are particularly available for the efficient monitoring of warehouse processes.

of coverage of your
warehouse logistics
processes

Individual process consulting

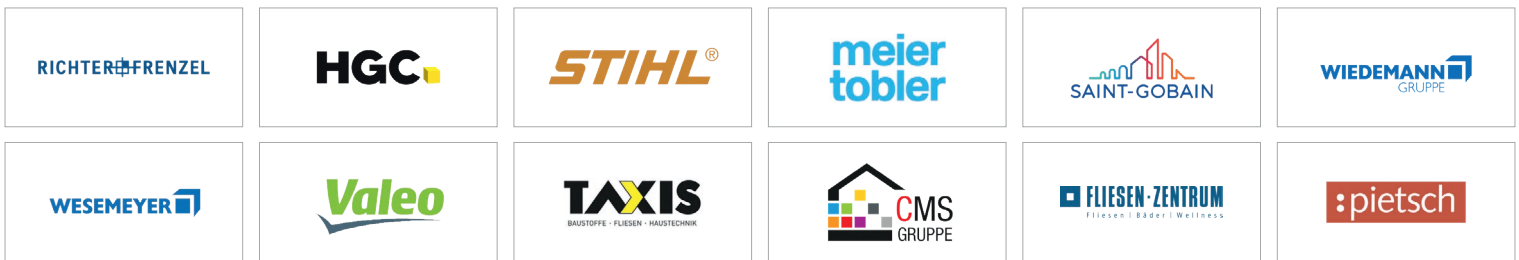

FIS logistics solutions

Warehouse logistics specifically under SAP S/4HANA

SAP S/4HANA presents the new and modern platform for tomorrow's warehouse logistics. The following scenarios result therefrom:

- The functions from SAP LES/WM are available in the medium term in SAP S/4HANA via the compatibility mode
- SAP EWM Basic is the solid new basis for your warehouse logistics in SAP S/4HANA
- SAP S/4HANA EWM Advanced is the variant meeting the highest demands in warehouse logistics whether as local solution (by-side) or embedded in the ERP system

REFERENCES

HIGHLIGHTS
