RELEASE-HIGHLIGHTS *FIS*/wws NextGeneration
THE APPLICATION AND ITS BENEFITS

FIS/wws NextGeneration (NG) is the industrial solution for technical wholesale and compound groups based on SAP S/4HANA. To meet the requirements of this industry sector, we have particularly optimized and amended functions in Sales and Distribution as well as in Purchasing and Procurement within SAP Operations. As a specialized provider, we deliver numerous wholesale-specific additional functions that complement the SAP standard version.

The industry-specific configuration of *FIS*/wws NG reduces adjustment efforts and implementation time. *FIS*/wws NG used in combination with SAP S/4HANA is the optimum support for technical wholesale business processes. Since 1996, *FIS*/wws has permanently been further developed and is currently used by more than 35,000 SAP users.

Your benefits:

- Shorter processing times than in the SAP standard system
- High functional scope due to numerous additional functions
- Easy handling
- High productivity

- Field-tested solution
- Modern and open architecture
- Sustainability, independency, scalability
- Possibility of exerting influence within the user association

RELEASE-HIGHLIGHTS *FIS*/wws NextGeneration

2022/Q1 – Latest Innovations

General information

- **Delivery of *FIS*/wws Release 2021 – Feature Pack Stack Initial Stack**
Delivery of *FIS*/wws NG 2021/08 (based on SAP S/4HANA 2021 Initial Shipment Stack)

- **Delivery of Fiori roles**
For daily use in the business areas of finance, controlling, purchasing, sales and distribution and logistics, relevant transactions can be called as tiles in the Fiori Launchpad.

Enhancement and optimization

- **Functions by integrating *FIS*/wws in SAP embedded EWM**
  - Goods receipt mail for postings in SAP EWM (transfer posting to storage location, stock in quality inspection to unrestricted-use stock)
  - SD document update for postings in SAP EWM (transfer posting to storage location, stock in quality inspection to unrestricted-use stock)
  - Enhancement of the route planning monitor (e. g. by further status fields)

- **Presentation of different profit margins in SD documents**
For supporting the price determination, multiple profit margins can be calculated and included according to individual rules. Depending on the setting, other purchase conditions (e.g. gross vendor price, incl./excl. basic discount, incl./excl. quantity discount, incl./excl. freight costs) are used as a basis for profit margin calculation in SD documents.

RELEASE-HIGHLIGHTS *FIS*/wws NextGeneration

- *FIS*/cash enhancement by payment service provider PayPal

  Payments via PayPal can be managed in *FIS*/cash. In case of returns, payments can be posted back to the customer's PayPal account via a separate returns document type.

- Adding of attachments during document creation

  Due to the print function, attached documents can also be output via mail dispatch when SD documents are created.

- Individual composition of SD document data

  In the new "ALV" tab, the overview of SD document data can be composed individually. Documents can be filtered and sorted, data can be exported to Excel or the service level can be simulated for instance. Furthermore, a traffic light display supports the user. This enables a fast and uncomplicated research especially for comprehensive quotations or orders.

2022/Q1 – Latest Innovations

- *FIS*/wws Fiori Customer Analysis App

  This app displays relevant customer data at a glance (sales volume data, credit data, profit margin). The data can be graphically displayed at material group level for instance - in the course of a year or in comparison to previous periods.

- *FIS*/wws Fiori Object Monitor App

  This app can be used to analyze object data (e. g. object volume, object status, object items, object documents).

- Enhancement of optimized rescheduling

  Update of the document table not only for articles posted in the goods receipt, but also in the following cases:

  - Order item is canceled
  - Order item is deleted
  - Order quantity is reduced

- Enhancement of DPD Web service 4.4

  The current DPD Web Service Version 4.4 has been integrated.

- Enhancement of cash desk safety regulation

  Permanent adjustment to statutory provisions within the cash desk safety regulation.
