## THE APPLICATION AND ITS BENEFITS

The FIS/fci optimization as part of FIS/edc can be used to automatically enter **paper documents** or **electronic documents**, such as PDF documents, in the existing SAP solution. Document characteristics, such as vendor name, address, phone, fax, bank details and tax number, are automatically matched with the master data record in the ERP system.

Excellent recognition rates are achieved using an extensive **test methodology**. Of course, FIS/fci is suitable for all typical documents in companies, such as invoices, order responses, delivery notes and orders.

### Your benefits:

- Genuine free form recognition
- High recognition rates as from the first invoice
- Self-learning system (knowledge base)
- Vendor recognition > 95%
- Reading of item data
- Automatic check: e.g. art. 14 UstG (sales/purchases tax law); totals, taxes, country-specific requirements, etc.

# RELEASE-HIGHLIGHTS FIS/fci Cloud

## 2024 – Latest Developments

- **Analysis dashboard for system and process optimization**
  - An additional Fiori tile for a dashboard in the system enables the user to have important KPIs displayed.
- **Complete provision of FIS/fci in the cloud (multi and single tenant)**
  - By making FIS/fci available as a multi and single tenant, the customer is provided with the highest degree of flexibility and isolation and with the multiclient capability of a system.
- **Web-based document supplement**
  - The intelligent document supplement based on experience values and existing master data is now also made available as a web-based solution. As a consequence, access to the service can be facilitated and made available for the user in a short time.
- **Efficient mass processing**
  - A guided processing dialog enables the efficient mass processing of documents.
