

FIS/mpm Training Courses

Master Data Management in SAP

FIS offers FIS/mpm users a modular training program for beginners and professionals. As the entire program is divided into clear focus topics, you can either book individual training days or the full training package. In addition, FIS offers individualized FIS/mpm training courses (further training) for your employees.

1 Basic Training Course

Prerequisite: basic SAP MM knowledge
Training goal: effective operation of the FIS/mpm maintenance tools
Target group: users, master data managers, key users
Duration: according to the customer-specific requirement

Training content:

- Operation of the FIS/mpm maintenance tools
 - FIS/mpm (NextGeneration): material master, conditions, business partners, documents, SD functions
 - FIS/mpm (ECC): master data, conditions, vendors, customers, business partners, documents, bills of material, SD functions, rebates
- Maintenance tools: selection, overview, detail screen, change functions
- Data exchange: import and export processes
- Overview of Web forms and workflow
- Log evaluation

2 Advanced Training Course

Prerequisite: FIS/mpm basic training course
Training goal: detailed building up of expert knowledge in the FIS/mpm maintenance tools
Target group: master data managers, key users
Duration: according to the customer-specific requirement

Training content:

- Customizing of the FIS/mpm application:
 - default values and automatic view enhancement
 - diverse mapping functions, such as character string function and restructuring
 - duplicate check
- Web forms and workflow
- Job control
- Central master data server
- Authorization control
- Enhanced FIS/mpm functions
- Evaluation options
- Analysis tool

FIS/mpm Training Courses

Master Data Management in SAP

3 Delta Training Course after Release Upgrade or S/4HANA Transition

Prerequisite:	FIS/mpm release upgrade or S/4HANA transition
Training goal:	introduction to the new features after a release upgrade or S/4HANA transition
Target group:	master data managers, key users
Duration:	1 day

Training content:

- Introduction of the new functions
- Introduction of new modules, if available

4 Developer Training Courses

Prerequisite:	advanced ABAP knowledge
Training goal:	introduction to the BAdI implementations
Target group:	developers on the customer side
Duration:	1 day on site + 1 day for preparation and follow-up (duration may vary according to customer-specific requirements)

Training content:

- BAdI implementations
- Integration of Z fields
- Introduction of customer-specific developments made
- Development procedure
- Workflow training: FIS/mpm basics (workflow knowledge is required. Higher expenses are incurred here.)

Organizational Information

Training material

Training material may be provided depending on the type and scope of the training course. User documentations are available for different FIS/mpm application areas reflecting the FIS/mpm standard version.

Moreover, it is possible to create specific training material for customer-specific user cases or exercises for an active involvement of the participants. This means increased efforts for preparation and follow-up, which should be discussed in advance with the consultant.

If the courses are held remotely (e.g. via MS Teams), recordings are strictly prohibited.
